CBT is Cognitive-Behavioral Therapy

&

**ABC way is Antecedent (Situation/Event),
Belief (Thoughts), and Consequence (Feelings)**

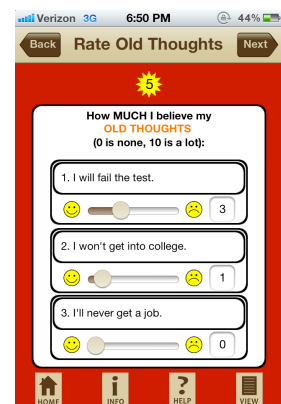

The CBT*ABC way apps from TikalBayTek are to help young kids, teens, and adults practice paying attention to negative thoughts and to learn to challenge them with reasonable thoughts.

The apps help coach brains to be good Fact-Checkers! They can also help practice what counselors and therapists teach in sessions related to issues such as anxiety and depression.*

Think of these FACT-CHECKERS when you need REASONING thoughts!
